themselves for the building of good roads.

And it seems that when the Legislature enacts a law to enable us to better the roads it is not complied with. The law providing for a road engineer is not complied with. The legislature intended that this office should be filled by a Civil Engineer, by a man who could take his instruments and locate the county roads upon scientifie lines and proper grades. It was never contemplated that men who can

not distinguish between a transit and a bird trap would be appointed to the office of road er.gineer. The law makers intended to provide so that each county might pave the way for maeadamized roads by first securing sensible grades for the dirt roads.

With roads graded and leveled Kentucky is that the people do as they should be and properly not realize the great benefits drained, even dirt roads can be that the farmers would derive made fairly good for most of the year, but they cannot be unless good roads are. Kittrell and the azalea howled along Claybourne avenuo: he leaned back on the cushlons; and adopted the expresston of ennul appropriate to that thoroughfare. Would Edith now prefer Claybourne Avenue? With ten thousand a year they could, perhaps-and yet, at first it would be best not to put on airs, but to go right on as they were, in the flat. Then tho thought came to him that now, as the cartoonist on the Telegraph, his name would become as well known in Claybourne Avenue as it had been in the homes of the poor and humble during his years on the Post.
